

# UCOM

By Russell Owens, CEO

UCOM, INC, established in 1994, is a five times winner of DSCC's Recognition for Excellence award and is honored to have been selected as a potential supplier for the JLTV program EMD phase.

UCOM's Engineering and Quality Departments are working closely with various OEM's on new and improved products for the JLTV program and have submitted several designs and prototypes to these Original Equipment Manufacturers.

## Products submitted to various OEM's include:

**Four Pole Ignition Switch-** a modified version of UCOM's current ignition switch with the extra position for auxiliary

**Double Pole, Single Throw Battery Disconnect-** for operating power systems running in parallel

**Three Pole Ignition Switch-** re-engineered for better durability and longevity, elimination of carbon tracking and degradation of insulating materials

**Stoplight Switch-** upgraded- to be lever spring loaded and designed to return to either an "off" or "on" position

**Single Pole, Single Throw Battery Disconnect** redesigned for JLTV use
